

HIRING FOR 2024-2025 – FUNDING PENDING

Forest City Midwifery C.A.R.E. (formerly Womancare Midwives) is looking for a New Registrant to join our well-established practice of 13 midwives.

With a catchment area encompassing the city of London and privileges at London Health Sciences Centre (LHSC - Victoria Campus – level 3), our practice is seeking a full-time New Registrant to help us serve our diverse community.

Forest City Midwifery C.A.R.E.(FCMC) supports a mixture of primary and shared-care call structures as well as full and part-time caseload options. This flexibility encourages excellent work-life balance for those who practice at our clinic. FCMC strives to provide a supportive working environment and has a long tradition of mentorship for New Registrants. FCMC also welcomes collaboration – not just with each other, but with community health care providers as well.

The Midwifery Department at London Health Sciences Centre has established ongoing EMCM funding programs which provides further opportunities to strengthen our relationship with our colleagues both in hospital and in community.

Our spacious clinic, which is conveniently located across the road from LHSC Victoria Campus, has 5 clinic rooms, 2 washrooms, a kitchen and a large comfy meeting room as well as providing ample free parking for midwives and clients. We employ two full-time support staff to keep our practice running smoothly.

We are seeking hardworking, driven applicants who have exceptional communication skills, are team players and are dedicated to providing clients with informed choice. BIPOC midwives and midwives capable of providing care in languages other than English are encouraged to apply.

Please send your resumes via fax to 519-645-8802 (attention Laurie Murphy) or via email to admin@forestcitymidwiferycare.ca (please include “NR Position Interest” in the subject line).

Of note: Womancare Midwives was established over 30 years ago in London and effective July 25, 2022 we have now become Forest City Midwifery C.A.R.E. The acronym stands for Choice, Advocacy, Respect and Empowerment. Our intention in changing our name was to reflect the principles of diversity, equity in health care and inclusivity to the greatest degree. It is important to our practice that pregnant people in this community who do not identify as women feel safe to seek care from our clinic.
