

NEW REGISTRANT

ACCEPTING APPLICATIONS FOR JULY 2023

Born Midwives is hiring a **New Registrant** to join our growing and diverse practice of 7 midwives in Cambridge, ON. Our successful applicant will have a dedicated mentorship team and a supportive transition into the community. We have a caseload built with EDDs beginning 6-8 weeks after the initial clinic date, which is negotiable. The NR will start in a primary care model though we are open to discussing alternative care models in the future. We aim to extend the contract beyond the NR year.

Our practice is located conveniently across the street from Cambridge Memorial Hospital where we can order oxytocin and epidural on our authority. We have fostered an excellent relationship with our consultants. It is a level 2 hospital with a new and beautiful Labour and Delivery space. NRs are provided with an in-depth hospital orientation to adjust to the community. NRs coming from partial scope communities will have additional training to ease transitioning into full scope.

At Born Midwives, we cultivate an environment that benefits their midwives' desires and wellbeing. We encourage our midwives to communicate any needs that may arise, including additional learning opportunities and unexpected off-call time. We provide equalized billing to ensure our NRs get paid even without discharges that month.

Our catchment area covers Cambridge, North Dumfries, and the surrounding area. Newcomers to the Cambridge community will enjoy the three historic Galt, Preston and Hespeler downtown cores with bustling community activities and local businesses. There are many hiking trails, lakes, and the Grand River for those who enjoy the outdoors. Applicants looking to settle will find that real estate costs are significantly lower than in the GTA or Kitchener-Waterloo.

If you are interested, please provide a CV via e-mail with the subject line: **NR POSITION.**
