

## NEW REGISTRANT POSITION

Our practice has funding available for a New Registrant position for the 2020-2021 fiscal year.

We are looking for a candidate to begin in the fall of 2020, with full-time caseload that will be booked into care before the NR begins. The position is for 1 year, with the possibility of a long-term position.

Our catchment area includes several small towns and a rural area, with clinics in Grand Valley, Fergus and Mount Forest. We provide prenatal home visits for Old Order Mennonite communities. We use an EMR (OSCAR) for charting, and have excellent administrative support. Our out-of-hospital birth rate is approximately 20%.

We attend most of our hospital births at Groves Memorial Community Hospital (Level 1+) in Fergus. The new Groves hospital is scheduled to open in July 2020. GMCH has a history of supporting midwifery practice and promoting excellent interprofessional communication. Midwives are welcome to attend weekly obstetric rounds. Currently there are about 475 births/year at Groves. Obstetric, family physician and anaesthetic back-up are available 24/7. We maintain care for epidurals; oxytocin is a transfer of care.

We occasionally attend births at Louise Marshall Hospital (Level 1) in Mount Forest. This is a very small rural hospital suitable for low-risk births only – there are no obstetric or anaesthetic services available.

Ideal candidates are enthusiastic, self-motivated, and have excellent communication and documentation skills. Our practice is looking for a New Registrant with a genuine interest in living and working in a rural community.
