

## **Locum Position**

Kitchener-Waterloo Midwifery Associates are seeking a Locum. This position will have a client caseload already onboarded. Start dates for clinic and births can be negotiated.

We are a thriving practice of 8 midwives, operating out of our new clinic, located conveniently across from Grand River Hospital where we hold privileges. Our clinic is bright and spacious with a new birth suite, which many of our clients choose to use, adding to our high 'out of hospital' birth rate of 20-25%. We are a predominantly urban practice with a diverse clientele. We work in two care teams, in a primary care model. We value work/life balance and work in a call model that includes 48 hours off call each weekend along with 2-3 full months off a year. We are open to new call models moving forward, as we value flexibility and a supportive working environment.

Grand River Hospital is a level-two site, at which we hold privileges. We currently provide care with epidurals and are working towards full scope care, with oxytocin privileges being implemented this year.

Kitchener-Waterloo is an exciting area, with vibrant downtown cores and great amenities. KW provides city life with that small town feel. There are two universities and local colleges that give an exciting, vibrant urban environment with many natural parks and trails ready for you to explore. We would welcome new registrants to apply from all backgrounds who are self-starters, have strong communication and organization skills. We look forward to carefully reviewing all applications.
