

# Midwives of Brampton & Halton Hills

Midwives of Brampton and Halton Hills is looking to hire a General Registrant for a locum position. Planned caseload and on call start date is for September 2022. We can offer some flexibility with the start date as well as the orientation and clinic done prior.

The plan for the successful candidate is to work full time in an existing three-person shared care team. This shared care schedule is a rotation of 6 weeks alternating between on call weeks and clinic weeks, followed by 3 weeks scheduled vacation time.

(As a practice we recognize that many personal and work needs have changed for midwives in the last few years, and so if you have ideas for a different model, we still encourage you to apply and share your vision. While we feel hiring for a three-person team works well for our practice, we are open to learning different ways that could also contribute to mutually beneficial work relationships.)

We are an established practice of midwives who have been serving Brampton and Halton Hills since 1994 with a commitment to:

- creating a safe, positive, non-oppressive environment for all colleagues and clients
- developing strong systems of clinical and business practice
- finding healthy work life balance
- teaching and supporting student education
- providing job security and satisfaction for support staff

All midwives hold privileges at Brampton Civic Hospital and Halton Health Services-Georgetown site. Midwives in our practice provide full scope of care in both hospitals so comfort/experience with managing epidurals and oxytocin would be an asset.

We invite resumes to be submitted to our office by email. Only successful candidates will be contacted for an interview shortly thereafter:
