Seeking a General Registrant to start May 2023

We are looking for a GR for a one-year contract with the potential for extension. We value and strive for a healthy work/life balance. Our midwives work in a hybrid model in teams of 2 and 3 that allows for continuity as well as regular time off. We are offering flexibility in roster, caseload and holidays and will accommodate the right candidate. Holidays commence at 10 wks for full caseload (36bcc) midwife.

We are a rural/remote practice of 5 midwives, established in 2005. We have privileges at Pembroke Regional Hospital (level 1) where we have respectful inter-professional relationships. Pembroke Hospital has 5 OB's and participates in MOREOB. Our scope at PRH includes management of epidurals and oxytocin augmentation.

MVM has 2 unique clinic sites. We work out of a busy medical clinic in Petawawa (75% client base) and out of a Community Resource Centre in Killaloe (25% of client base). Our homebirth rate ranges from 30-40%.

The right candidate will be an energetic individual who is committed to rural women's health, display excellence in clinical skills and be comfortable with homebirth at a distance from hospital. With our large catchment area and 2 clinic sites, clear communication and organization skills are depended on. We use EMR, so a laptop or tablet are essential tools of the trade.

MVM has a commitment, both to our clients and within our practice, to foster a supportive and respectful working environment. We welcome a positive outlook and a sense of humour.

Bordered to the east by the Ottawa River and to the west by Algonquin Park, our catchment area is vast and the NR can expect to do lots of driving, in all types of weather. It's important to be comfortable with rural driving and winter driving conditions. Renfrew County is beautiful rolling countryside, full of lakes, rivers, and forests with lots of outdoor recreation opportunities. Our small urban centres include Petawawa, Pembroke and Renfrew and have an array of entertainment and shopping opportunities, including vibrant farmer's markets.

If what you've read interests you and you think rural midwifery is for you, please email us your cover letter and resume to:
