## Seeking a New Registrant to start as early as July 2022

We are a rural/remote practice of 5 midwives (with 1 on leave until January 2023) established in 2005. We have privileges at Pembroke Regional Hospital (level 1) where we have respectful inter-professional relationships. Pembroke Hospital has 4 OB's and participates in MOREOB. Our scope at PRH includes management of epidurals and oxytocin augmentation. Our midwives work in a hybrid shared/primary care model in teams of 2.

MVM has 2 unique clinic sites. We work out of a busy medical clinic in Petawawa (75% client base) and out of a Community Resource Centre in Killaloe (25% of client base). Our homebirth rate ranges from 30-40%.

The New Registrant can expect a caseload of 35 clients, 10 weeks of holidays and regular off-call time.

The right candidate will be an energetic individual who is committed to rural women's health, display excellence in clinical skills and be comfortable with homebirth at a distance from hospital. With our large catchment area and 2 clinic sites, clear communication and organization skills are depended on. We use EMR, so a laptop or tablet are essential tools of the trade.

MVM has a commitment, both to our clients and within our practice, to foster a supportive and respectful working environment. We welcome a positive outlook and a sense of humour.

Bordered to the east by the Ottawa River and to the west by Algonquin Park, our catchment area is vast and the NR can expect to do lots of driving, in all types of weather. It's important to be comfortable with rural driving and winter driving conditions. Renfrew County is beautiful rolling countryside, full of lakes, rivers, and forests with lots of outdoor recreation opportunities. Our small urban centres include Petawawa, Pembroke and Renfrew and have an array of entertainment and shopping opportunities, including vibrant farmer's markets.

If what you've read interests you and you think rural midwifery is for you, please send us your cover letter and resume, including 3 references to:
