

Midwives of Windsor

New funding available

1 New Registrant Position Available URGENTLY NEEDED

Full caseload available

Windsor and Essex County is a wonderful place to live with Detroit right across the river. We have all the cost savings, safety, and low commute times of a small city but have the advantages of a large city, with great shopping and an international airport all within a 10- 30 minute drive. Windsor is the 4th largest ethnically diverse city in Canada. We also have great restaurants, entertainment and wineries at our door step.

We are seeking 1 NEW REGISTRANT to start as soon as possible. With the potential of a full case load to start. We would like to see this person work for at least 1 year or longer if this works for all parties.

Off call is reasonable with 2 months a year and 5-8 days a month and we provide primary care, with coverage for off call times.

We are a well-established practice seeking midwives who wish to work and remain in Windsor. We care for women in a primary care capacity.

Our practice is busy with a good rural and urban mix. We have about a 30% home birth population.

Our population is ethnically diverse and we care for women from all walks of life.

We care for our own inductions, augmentations and epidurals.

We have amazing hospital relations.

We deliver at Windsor Regional Hospital which is a level 2-3 hospital.
