

Full time New Registrant Position at:  
Riverdale Community Midwives for 2022-2023  
Start time, preferably June 2022  
BCC 30-36/year

Riverdale Community Midwives has been in Toronto's east end since 1994 and serves a diverse group of clients from all of Toronto. We are in an area undergoing vast geographic and demographic change. Within a few short years new communities with their growing families have sprung up around us and as the Portland and Regent Park re-development gets underway we expect exponential and vertical growth. We have privileges at St Michael's Hospital and the Toronto Birth Centre. Our midwife group maintains cohesive coverage with well thought out and managed time off while supporting a primary model of care. Nonetheless, we are ever evolving and support healthy dialogue around new ideas in care models.

As our new registrant we are committed to extending every support and mentorship to enable a productive and fulfilling year. Past New Registrants have had a full caseload with plenty of opportunities for out of hospital birth. We manage oxytocin and epidurals at our hospital, and have forged collegial relationships there.

Our midwifery group brings a collective trove of educational experience, and practicality to your new registrant year. As daunting as the past pandemic months have been they have brought their own reward and cohesion and we have come to expect the unexpected.

We are accepting applications until Jan 28<sup>th</sup> 2022, please forward your resume to [info@riverdalemidwives.com](mailto:info@riverdalemidwives.com)

Only those accepted for interview will be contacted, we thank you for your application
