

The Hamilton Midwives is seeking new team members!

start date, call model and caseload are negotiable

We are a well-established, full scope practice. Our values include supporting each other in our work and wellbeing, team work and collaboration. We offer generous off call and vacation time, sleep relief and sick leave coverage. As a new member, orientation and support will be provided while you get established in our community. We are offering a 2 year contract and this could become a permanent position with opportunity for partnership. We also welcome those seeking a shorter term commitment to apply. Our midwives work in both primary care as well as shared care and at a variety of caseloads and we are flexible in these factors for the right candidate.

Oxytocin and epidural management and ease with e-documentation are essential skills for our team so previous experience is an asset. Fluency in Arabic and other non-English languages is highly valued. We encourage candidates that identify as IBPOC as we value a diverse practice group that reflects the community we serve.

Our hospital is St Joseph's Healthcare and we are working to develop a midwifery-led unit where midwifery autonomy and physiologic birth are promoted. We are a predominantly urban practice with a very manageable catchment area. Our clinic space is new, bright and airy with a comfortable staff area for admin work, collaboration and socializing.

Hamilton benefits from close proximity and excellent transportation links to the Toronto and Niagara areas. We have a vibrant cultural and arts scene, scores of excellent restaurants and many green spaces. It is the waterfall capital of Canada.
