

## Community Care Midwives (Oshawa)

We are looking for a New Registrant to join our team of Midwives.

CCM is a well established practice serving a diverse population in a mostly urban center.

We provide care in a shared care model with an equitable call schedule. We focus on a work/life balance for longevity of our midwives. As such, many of the midwives in our practice have been here for a long time and/or have stayed after their student placement at our practice.

CCM has privileges at Lakeridge Health Oshawa Hospital. We have a great relationship with the team we work with, the Obstetricians, nursing staff and clerical staff. CCM has full scope privileges with both oxytocin and epidural management. Midwives of Community Care Midwives are integrated into all aspects of policy developments including task forces and policy writing.

The New Registrant candidate we are looking for will hopefully blend into our lovely group of midwives. We love to talk (and talk, and talk), and eat (chocolate is ALWAYS available in the lunch room!). Lunch out (pre-COVID) was the norm for our group and we celebrated every milestone with a get-together with food and fun.

The New Registrant will have a full caseload immediately and a strong mentoring process to guide the New Registrant through their first year.

If all of the above sounds interesting to you forward your resume to
