

***FUNDING APPROVED* New Registrant Position With the Community Midwives of Kingston**

We are a team of 17 midwives known for our strong sense of humour and commitment to maintaining a healthy work-life balance. Our well-established practice, located in the heart of Kingston, thrives on mutual support and collaboration. We're backed by an outstanding administrative team, and with the recent integration of Accuro EMR, managing our clinic schedule has never been easier. Our newly renovated clinic features a soundproof birth room equipped with a high-quality birthing tub and a range of soothing amenities designed to create a calm, comfortable birthing experience.

The fortunate candidate will come and join us for a 2 month orientation and a caseload of 36-40 BCC's with a flexible start date. Your team model and on-call schedule to be determined. We have privileges at Kingston Health Science Centre (KHSC) where we maintain excellent collaborative working relationships with management, OB's, RN's and Anaesthetics. KHSC is a level 3 teaching hospital and is affiliated with Queens University which allows for educational opportunities for RN, NP, Medical students and GP fellows at our practice.

We are strong supporters of home birth as a valid and informed choice for families. At KHSC, we provide comprehensive care that includes managing epidurals, Foley and ARM inductions, and offering water births using the stand-alone tubs installed on site. In June 2024, a pilot program for oxytocin inductions was launched, allowing care to be transferred back to midwives once active labour is established.

Kingston is a vibrant and dynamic city with plenty to offer. Its lively downtown is full of energy, featuring a wide array of entertainment, dining, and shopping options that continue to grow in popularity—especially among tourists. Just a short drive from the peaceful countryside, Kingston offers the best of both worlds. Conveniently located within three hours of Toronto, Ottawa, and Montreal, and nestled along the stunning shores of Lake Ontario,

We would love to hear from you. Please send a CV and letters of reference to :
