

Community Midwives of Thunder Bay is seeking a General Registrant, or a New Registrant Midwife to cover a leave starting April 2024 (start date flexible), for a minimum of 1 year.

Our well-established midwifery practice is considered an urban practice, located in Thunder Bay, Ontario. Midwives are privileged at the Thunder Bay Regional Health Sciences Center, a level 2b hospital, and can practice Full-Scope (epidurals and oxytocin). We have representation at our hospital through the Department of Midwifery and hold monthly meetings with three other midwifery groups (Odapinnaawaso Ikweyog, Maternity Care Midwives, and EMCM midwives from the NorWest Community Health Center). Most of our clients choose a hospital birth while 10-15% of our clients choose an out-of-hospital birth.

Our practice is committed to a healthy work-life balance while maintaining continuity of care in teams of 2 and 3 midwives. The plan for the midwife joining our practice will be to work on a team of 3 midwives with an on-call/clinic/off schedule. The exact number of BCCs available is negotiable and is expected to be between 30-36 per year.

The population of Thunder Bay is diverse with over 30% of residents identifying as Indigenous, so priority will be given to candidates who are Indigenous or have experience working with Indigenous peoples (more precisely, Cree, Ojibway, and Oji-Cree).

Please email your CV and cover letter (or questions about this position), to [manager@communitymidwives.net](mailto:manager@communitymidwives.net)
