

Genesis Midwives

beginning with care

General Registrant Locum to start immediately

Due to an unexpected injury to one of our midwives, Genesis Midwives appreciates your help in providing excellent care to our clients, for at least the next three months.

Our five midwives have full-time case-load working in a model of shared call: the midwives not on holiday work alternating week on-call and week off-call. The off call weeks include clinic hours and emergency call. We provide prorated monthly payments to allow for a predictable income. The locum will cover the injured midwife's call schedule and will be compensated with the currently booked caseload.

Our cozy clinic is located across the street from Grand River Hospital with free parking. We serve a diverse clientele of families from many cultures. Our home birth rate is about ten percent. Our relationships with consultants, nurses, and midwives in this community are excellent. Midwives at Grand River Hospital retain care for epidural management and transfer care for oxytocin.

Genesis Midwives has been serving the community of Kitchener-Waterloo for over ten years. We are a small practice and pride ourselves on the supportive ways we take care of each other. Our catchment area includes the cities of Kitchener and Waterloo and the surrounding rural areas including Wellesley, Baden, New Hamburg and New Dundee.

We welcome your application beginning today. The successful candidate will meet all CMO requirements and will secure locum privileges at Grand River Hospital.

Please send your letter of interest and resume to the attention of our Administrator, Amy McDougall:
