

Madawaska Valley Midwives

Seeking locum through AOM Locum Program

- June 2019 thru August 2019 -

Start/finish dates are flexible

We're looking for a General Registrant Midwife to come to our beautiful cottage country and cover holidays for 3 of our midwives over the summer months of 2019. Through the AOM Locum Program, we are able to arrange coverage for 3x 28 days (84 days total). We are flexible with start/finish dates and the 28 day periods do not necessarily need to be back to back, allowing some time off for the locum to enjoy all our area has to offer in the summer months.

We are a rural/remote practice with caseload for 4 full-time midwives. Our midwives work in two teams in a shared care model.

We have privileges at Pembroke Regional Hospital (level 1). Pembroke Hospital currently has 2 OB's and participates in MOREOB.

MVM has 2 unique clinic sites. We work out of a busy medical clinic in Petawawa (75% client base) and out of a Community Resource Centre in Killaloe (25% of client base). Our homebirth rate is 35-40%. The on call schedule is week on call/week off-call with clinic and there are 3 weekly clinic days.

Bordered to the east by the Ottawa River and to the west by Algonquin Park, our catchment area is vast and the Midwives do lots of driving, in all types of weather. It's important to be comfortable with rural driving and winter driving conditions. Renfrew County is beautiful rolling countryside, full of lakes, rivers, and forests with lots of outdoor recreation opportunities. Our small urban centres include Petawawa, Pembroke and Renfrew and have an array of entertainment and shopping opportunities, including vibrant farmer's markets.

Please send your resume with references and a cover letter to Leslie Soopalu, Practice Coordinator
