

Midwifery Data Matters: NEW Midwifery Clinical Report

Midwives asked BORN for a quick way to look at their practice group statistics

It's here! The new **Key Indicator Midwifery – Infant Summary Report** is now live in the BORN Information System (BIS).

There are 22 infant indicators in this report, selected by midwives on the BORN Midwifery Advisory Committee (MAC). The report shows counts and frequencies of infant indicators such as: birth location, Apgar scores, birth weight, newborn resuscitation, gestational age at birth, transfers to NICU, and more.

Who has access to this report?

Midwives with BIS Data Entry access at a Midwifery Practice Group may also have BIS access to Midwifery Clinical Reports. Access to Clinical Reports allows you to run this new report and see key infant indicator counts and frequencies for your practice group.

Note: Access to Clinical Reports can be granted by designated people at your practice, likely an administrator, manager, or practice partner.

How do I run this clinical report?

1. [Log in to the BIS](#) under your midwifery practice group.
2. Click on **Reports** in the top banner.
3. Select **Clinical Reports**.

The screenshot shows the BORN Ontario web interface. At the top, there is a navigation bar with buttons for HOME PAGE, DATA DICTIONARY, HELP, PROFILE, and SELECT ORGANIZATION. On the right side of the navigation bar, there is a user profile section with 'BORN\ ' and a 'Logout' button. Below the navigation bar, there is a search bar labeled 'Organization:'. The main content area features the BORN Ontario logo on the left and a navigation menu on the right with links for Patient Search, Messages, Reports, and Acknowledgement. The 'Reports' link is circled in red, and a red arrow points to a dropdown menu that contains three options: Clinical Reports, Administrative Reports, and Monthly Data Quality Reports. Below the navigation menu, there is a breadcrumb trail: 'Homepage → Reports'. The main content area is titled 'Reports' and contains three large buttons: CLINICAL REPORTS, ADMINISTRATIVE REPORTS, and MONTHLY DATA QUALITY REPORTS.

4. Click on **Key Indicator Midwifery – Infant Summary**. The report will open in a new window.

Maternal Newborn Reports		
Click on a Report Name link to view the report		
Report Name	Description	Report Update Timing
Key Indicator Midwifery - Infant Summary	Select any or all of the following infant indicators: Birth location; Apgars; neonatal resuscitation; delayed cord clamping; birth weight; gestational age at birth; transfers to NICU; arterial status; arterial and venous cord pH; confirmed congenital anomalies; newborn birth complications; neonatal health conditions; hyperbilirubinemia treatment; hearing screening; final neonatal disposition (discharges/transfers to/neonatal deaths); length of stay; feeding from birth to discharge; admitted to hospital in postpartum care	One day lag

5. Enter the following required information:

- The target **date range**.
- Select the **infant indicators** you would like to see (select as many as you like).
- Select the practice group you would like to run the report for (if you work at more than one midwifery practice).
- Click **View Report**.
- **Check out your data!**
