March 25, 2023

North Channel Midwifery has a 1-2 week locum available from April 15-30, 2023. The locum midwife will not have any planned primaries, but will support our very proficient New Registrant as the second midwife at births. The locum midwife may also be requested to complete some prenatal and postpartum visits within the catchment.

We have excellent collegial and supportive relationships with our physician and nursing colleagues at both our delivering hospital (modified level 1,) and the other hospital within the catchment which does not offer obstetrical services.

This is a great opportunity for a working vacation in a beautiful area. There are many fantastic vacation/short term rentals in the area, as well as motels and a hotel. Please feel free to email Tammy at the address above if you would like more information.
