

We are looking for a New Registrant for Summer 2026

Are you looking for a supportive and positive practice? We are a group of 7 midwives working in a shared care schedule. We have a beautiful clinic space in downtown Sarnia, minutes from our hospital, Bluewater Health. We maintain care for epidurals, but not for oxytocin. This model allows us to collaborate closely with our obstetrical colleagues and supports a sustainable midwifery workload. We use Accuro EMR in office and Powerchart in hospital. Our team benefits from excellent administrative support and highly supportive colleagues. We also work with a skilled second attendant who attends many of our back-ups. We are well integrated within our hospital community and do not anticipate any challenges in obtaining privileges.

Sarnia-Lambton is a wonderful place to live and work. Enjoy a lower cost of living, minimal traffic, and relatively mild winters. Our community offers beautiful waterfronts, numerous events and festivals throughout the year, and easy access to larger city amenities — Detroit is just a one-hour drive away and home to an international airport.

Caseload will be built up by the practice group and BCCs can be advanced. We plan for 1 month of paid orientation when onboarding new midwives. We have a long wait list of potential clients. This is a full time position on a team of 2, but we pride ourselves in flexibility with both caseload and call schedule. Some of our team work less than 40 bccs and some work more. This position has potential to become a permanent position.

Please email your resume including references to clinic@sarniamidwives.com or reach out if you'd like to come for a visit and see if this is a good fit for you. Applicants must be eligible for registration with the CMO. Midwives who identify as indigenous are especially encouraged to apply.
