

HIRING FOR 2021 – FUNDING APPROVED

Womancare Midwives is looking for a New Registrant to join our growing practice of 15 midwives. With a catchment area encompassing the city of London and privileges at London Health Sciences Centre (LHSC - Victoria Campus), our practice is seeking a full-time New Registrant to help us serve our diverse community. Womancare supports a mixture of primary and shared-care call structures as well as full and part-time caseload options. This flexibility encourages excellent work-life balance for those who practice at our clinic. Womancare strives to provide a supportive working environment and has a long tradition of mentorship for New Registrants. Womancare also welcomes collaboration – not just with each other, but with community health care providers as well.

The Midwifery Department at London Health Sciences Centre has recently received funding which provides further opportunities to strengthen our relationship with our colleagues both in hospital and in community.

Our spacious clinic, which is conveniently located across the road from LHSC Victoria Campus, has 5 clinic rooms, 2 washrooms, a kitchen and a large meeting room as well as providing free ample parking for midwives and clients. We employ two full-time support staff to keep our practice running smoothly.

We are seeking hardworking, driven applicants who have exceptional communication skills, are team players and are dedicated to providing clients with informed choice. BIPOC midwives and midwives capable of providing care in languages other than English are encouraged to apply.

Please send your resumes via fax to 519-645-8802 (attention Carly Griffith) or via email to admin@midwives.on.ca (please include “NR Position Interest” in the subject line).
